Screenings will be completed in under an hour. When you arrive at the screening, you will be greeted by a Health Gauge staff member. The staff member will check you in. The confidential health screening will include biometrics, such as height, weight, waist and hip measurements, resting pulse, and blood pressure. Non-invasive ultrasound screenings will be performed to identify blockages in the neck, abdomen, and legs. These blockages can lead to stroke and various cardiovascular conditions that can be life threatening and debilitating if left undetected and untreated. Additionally, a comprehensive blood draw will be completed.

These tests are not meant to replace your Primary Care Physician, but are meant to improve communication with your Physician at your next appointment.

The Fund Office sincerely hopes the program will provide convenient access that will allow you to take advantage of this benefit.
